DATA SCIENCE
@ ILLINOIS

Summary

16+ years of experience in solution designing and delivering Enterprise wide solutions to business problems starting with document management including data science and analytics, predictive analysis and recommendations. Extensively worked on eDiscovery of data that includes data cu-ration, data cleaning and building automated pipelines, converting into meaningful data followed by advanced analytics, Record Management , Email Management, Content Management and BPM technologies that includes, solution designing, solution architect, implementation followed by support and tuning the models and people management.

Self motivated and have organizational ability to effectively set priorities to achieve immediate and long-term goals and meet operational deadlines. Possess strong interpersonal abilities for working with various different team members and executive and build effective partnership with business leaders.

- Expert in opentext Documentum Upgrade and its enterprise wide implementations
- Expert in delivery and ensuring applications to follow company IT standards.
- Experience of working at customer locations in US and UK for setting Digital strategy & analytics apps for enterprise wide initiative

Roles & responsibilities

- ➢ Experience in managing and guiding Data Scientist, Leads.
- ➢ Experience in designing data science architecture within business framework using company IT standards Technologies
- ➢ Responsible for developing analytics strategy , use case identification, proof of concepts and end to end execution for true ROI
- ➢ Based on Data curation, interest area is to do predictive modeling to identify opportunities in advanced analytics
- ➢ Set up distributed architecture in linux and cloud based sol.
- ➢ eDiscovery of data and content on federated locations
- ➢ Electronic & Physical Records Management
- ➢ Product Evaluation. Feasibility analysis for requirements
- ➢ Help define client organization roadmap for implementation keeping future IT needs in perspective on Data Science and ECM.
- Performed following activities :
  - ➢ Preparing High level and low level design documents
  - ➢ Preparation of System Architecture documents
  - ➢ Preparation of System specification Documents
  - ➢ Coordination with Clients on Project Planning & reaching Milestones
  - ➢ Worked on advanced analytics implementations & provide detailed status to all of IT & business
  - ➢ Extensively Worked On Documentum upgrade from 5.3 → 6.5 → 6.7 → D7.1
  - ➢ Expert in setting and performing disaster recovery activity

Areas of Knowledge
Implement data curation, predictive modelling,eDiscovery of data, Machine learning, cloud computing, timeseries, Bayesian inference , KNN, along with improving on Deep learning (NLP, Image). Executed platform Upgrades, providing solution on Enterprise Content Management, Email Management, Records management, Business Process Designer, Retention policy services and records Management.

Languages / tools
R, Python, SQL , Oracle , Tableau, Kafka, SQLite, D3.js, Hadoop (learning), Documentum D2, Content Server,Adobe AEM, Taskspace, WebTop, DA, SCS, RPS, FAST(FTI), My Documentum, MDD, BOCS, Process Builder, Forms Builder, Composer, Workflow Manager, DAB, DAI, PL SQL, DQL, API, DFC, github.

DBMS
Oracle 7.x/8.x, 10g,, 11i , MS-SQL Server 2005, , DB2, Sybase, sqlite

Storage
NAS (isilon and VNX) and SAN storage.

Certifications/Trainings
- https://pnsoni3.github.io/prasannasoni/Certifications.html

Key Engagements
- Worked on setting up distributed opentext analytics platform and Documentum repository
- Implementation of Web Content Management and analytics for Automobile industry.
- EMC Documentum and Records management implementation for insurance company & Bank (US)
